Communication [15 marks] 12

1. The following compounds have comparable molar masses. Arrange the compounds in order of increasing boiling points and give reasons for your answer. Also, draw each compound below its name. [6 marks]

butanoic acid

- Polar
- hydrogen bonding

pentylamine

how different?
↔ HB

dipropyl ether

- Polar
- No HB

benzene

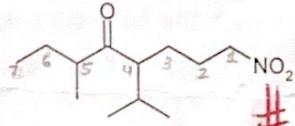

- Non polar
- No H-B

in order: Benzene, dipropyl ether, pentylamine, benzoic acid

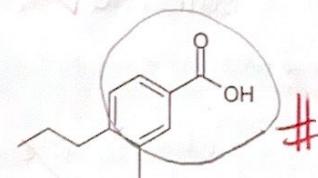

2. Write the IUPAC name for each of the following compounds. [5 + 4 = 9 marks]

(a)

5-methyl-3-methyl-8-nitrooctan-4-one

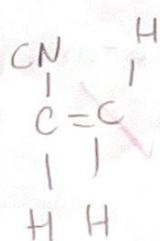

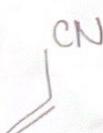

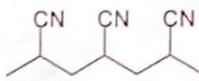

(b)

2-methyl-1-propylbenzoic acid

Making Connections [6 marks]

3. Orlon is the name of a synthetic material used to make fabric and clothing. It is an addition polymer. A portion of its structure is shown below. Draw a structural diagram of its monomer. [3 marks]

4. Lactic acid (2-hydroxypropanoic acid), produced by bacterial culture in yogurt, contains a hydroxyl group and a carboxyl group in each molecule. Draw a structure of two repeating units of a condensation polymer of lactic acid molecules. [3 marks]

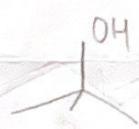

15

Knowledge & Understanding [10 marks]

5. Draw the structure and provide a name for each of the following. [10 marks]

(a) A tertiary alcohol with the formula $C_4H_{10}O$.

methyl propan-2-ol

(d) A ketone with the formula C_4H_8O .

butanone

(b) An ether with the formula $C_5H_{12}O$.

~~ether~~ propyl ether

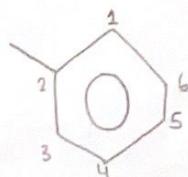

(e) An ~~ester~~ amide with the formula C_2H_5ON .

ethanamide

9

(c) An aromatic compound with the formula C_7H_8 .

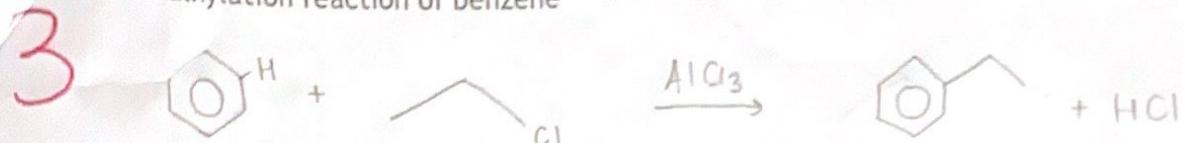

α -methylbenzene

Inquiry [27 marks]

6. Write the chemical equations to illustrate the following reactions. [15 marks]

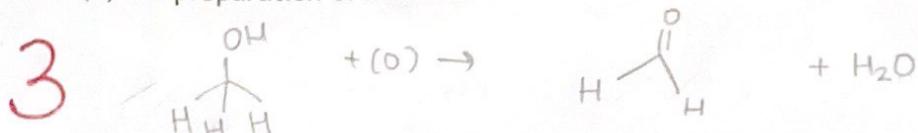

(a) an alkylation reaction of benzene

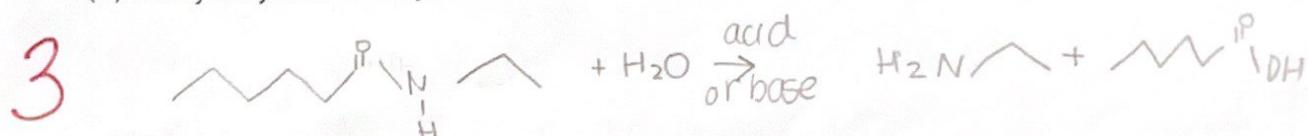

(b) an elimination reaction of 2-chlorohexane

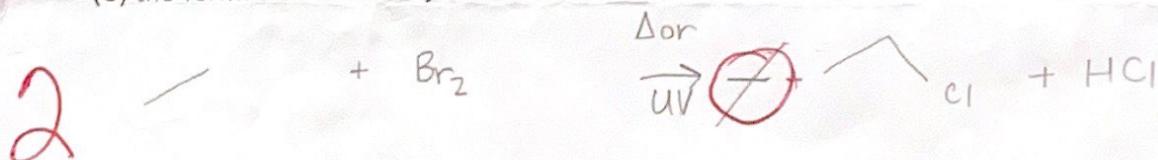

(c) the preparation of methanal from an alcohol

(d) the hydrolysis of N-ethyl hexanamide

(e) the formation of an alkyl halide from ethane

7. Describe a reaction pathway to synthesize 2-methylbutyl ethanoate, starting from ethane. 1° alcohol Include all pertinent conditions. Show all reactants and products using structural diagrams. [12 marks]
